

AUTOMATIC EJECTORS**SUPER AUTO EJECT**

AUTOMATIC POWER LINE DISCONNECT

**ACCESSORIES SUPPLIED AS STANDARD****CONNECTORS**

Highly reliable, industrial grade connectors, specially selected to function reliably with the Auto Ejects are provided with each unit.

**RUBBER CONNECTOR PROTECTOR**

The protector covers the plug with 3mm rubber to protect it from impact damage. Nearby vehicles and equipment are also protected.

**WEATHERPROOF COVER**

Blue flap with grey surround = 230V. Yellow flap with grey surround = 115V.

MODEL 091-55

15 AMP

The new Super Auto Eject is a completely sealed automatic power line disconnect. This prevents contamination of the mechanism by road dirt and ensures long reliable life even when mounted in the most severe environment.

A novel internal switch arrangement closes and opens the AC circuit after the mating connector is inserted and before the connector is ejected. This eliminates arcing at the connector pins and assures long contact life.

As with all Auto Ejects, the Super Auto Eject is connected to the starter circuit so that ejection occurs when the engine is cranked.

OPTIONAL ACCESSORIES**POWER CABLES**

We offer an extensive range of ready made power cables with connectors fitted for all types of connection applications, see page 29 onwards

**HOLE CUTTER**

Cuts hole of correct size through panel. Greatly reduce risk of burrs, sharp edges and surface damage. Easy to use. Speeds up installation of Super 15 Auto Ejects

**BACK WIRE OPTION**

For areas that need the wires to come from the rear of the Auto Eject. Particularly suitable for installations where space is limited.

| MODEL # | ITEM | CONNECTOR | WEIGHT | OUTLINE |
|-----------------|------------------------------|-----------|--------|---------|
| 091-55-15-120 | SUPER AUTO EJECT 15A 120V | 5-15P | 1.44KG | 019 |
